DOUNDO

Manual Print & Play

DoUndo® is a two-player strategy game of layered decision-making. Your goal is to match your 4 hand cards with the 4 top cards in a complete horizontal or vertical line. The game is played across three stackable layers by placing, swapping, and reading your opponent.

Players: 2 | Ages: 8+ | Duration: 15–25 minutes

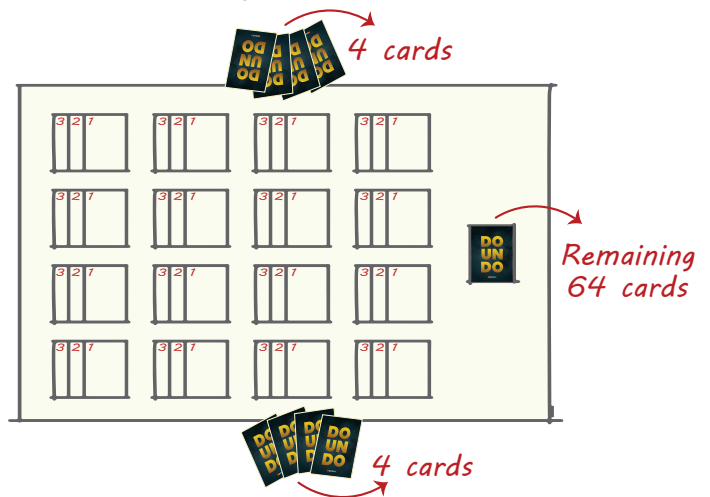

Glossary - Key Terms

- ✦ **LAYER** – One of 3 stackable layers. Fill each layer before starting the next.
- ✦ **TOP CARD** – The uncovered card on top of a stack. Only top cards can be swapped or count toward a matching line.
- ✦ **SWAP** – Exchange a card from your hand with an uncovered top card, then place the replaced card on another eligible stack in the current layer.
- ✦ **STACK** – A pile of up to 3 cards in one board space.
- ✦ **WIN** – When your 4 hand cards match the 4 top cards in a complete horizontal or vertical line.
- ✦ **FACE-OFF** – A challenge where both players reveal their hands. If two or more symbols match, you win. If not, your opponent wins.
- ✦ **CARD ACCESS** – Once covered, a card is locked and cannot be moved. Only uncovered cards can be swapped.

 SHAMAN (Healer)	 ENKI (Restorer)	 HERA (Queen)	 MITRA (Witness)	 SETNA (Illusionist)	 ARES (God of War)
 AHURA (Lord)	 ASGARD (Sanctuary)	 TITAN (Shield)	 LAOZI (Seer)	 SHIVA (Awakener)	 GAIA (Mother)

Game Setup

1. Lay the game board flat on the table.
2. Shuffle all 72 cards thoroughly.
3. Deal 4 face-down cards to each player.
Each player keeps their cards secret. This is their starting hand.
4. Place the remaining cards face down to form the draw deck.
5. Pick the first player at random. Then switch who starts each round.

Card Visibility

- All cards placed on the board are face up and visible to both players.
- Each player's hand is hidden from the opponent.
- The draw deck remains face down.
- Stack cards slightly offset so every symbol remains visible, even when covered by another layer.

Tip: Keep your hand hidden. If your opponent sees your cards, they might block your winning line.

Layering, Swapping and Stacking

The game is played across 3 stackable layers. Each of the 16 board spaces can hold up to 3 cards, one per layer.

Basic Rules

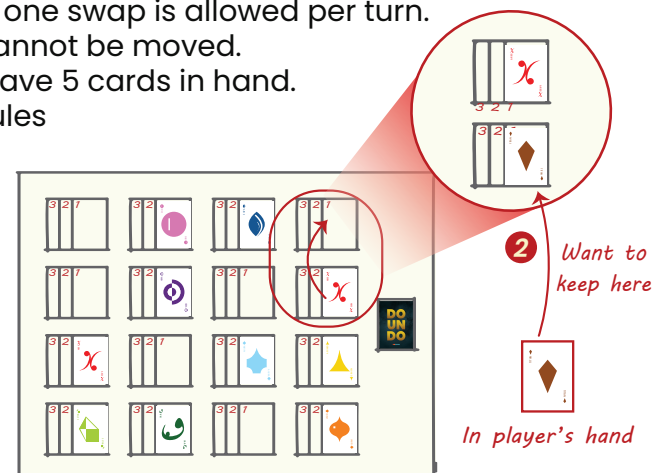

- Each layer must be completely filled before starting the next.
- Only uncovered cards can be swapped, and only one swap is allowed per turn.
- Once a card is covered, it becomes locked and cannot be moved.
- If you choose Draw & Play, Draw 1 card, you now have 5 cards in hand. Then, play 1 card according to the current layer rules

IMPORTANT: Your turn always ends with 4 cards in hand.

During Layer 1

Choose one of these two options:

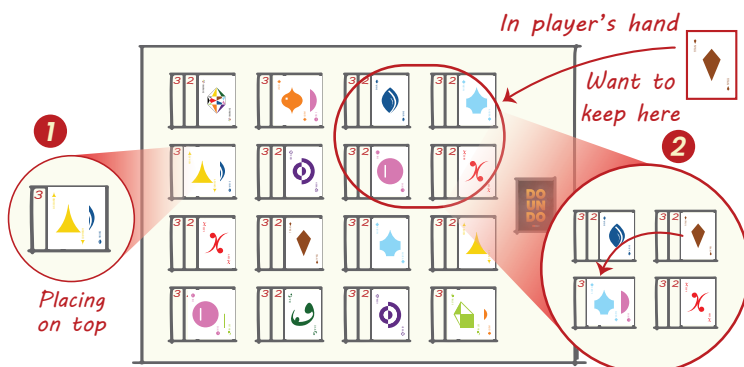

- 1 Place 1 card from your hand in any empty board space.
- OR**
- 2 Swap one card from your hand with a card on the board, then place the replaced card in another empty space.

When Layer 1 is Full

Layer 2 begins. From this point on, you can:

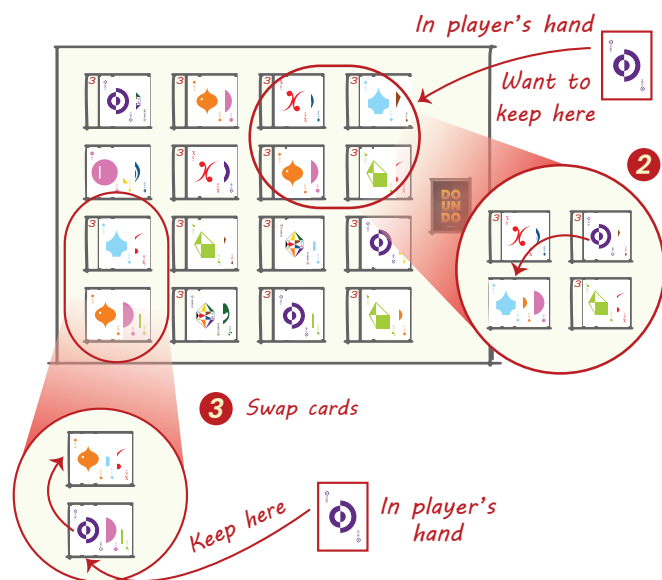

- 1 Place 1 card from your hand on any one-card stack.
- OR**
- 2 Swap a card from your hand with an uncovered Layer 1 card, then place the replaced card on another one-card stack.
- OR**
- 3 Swap a card from your hand with a card already in Layer 2, then place the replaced card on another one-card stack.

When Layer 2 is Full

Layer 3 begins, following the same logic:

- 1 Place 1 card from your hand on any two-card stack.
- OR
- 2 Swap a card from your hand with an uncovered Layer 2 card, then place the replaced card on another two-card stack.
- OR
- 3 Swap a card from your hand with a card already in Layer 3, then place the replaced card on another two-card stack.

Layering Summary

- Always fill one layer before starting the next.
- Only uncovered cards can be swapped.
- You may swap with an uncovered card in the current layer or the layer directly below it.

Ways to Win a Round

There are two ways to win a round:

1 Matching a Line

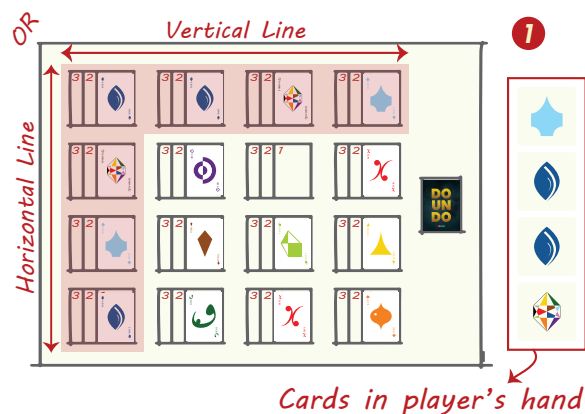

You win if your 4 hand cards match the 4 top cards in any complete horizontal or vertical line.

- Symbols can match in any order
- Duplicate symbols must also match in number
- Call "Win" on your turn, before drawing

2 Face-Off Victory

Instead of drawing a card, you may call a Face-Off:

- Say "Face-Off" and reveal your hand
- Your opponent must also reveal their hand
- If two or more symbols match, you win the round. Duplicate symbols count as separate matches.
- If fewer than two symbols match, your opponent wins the round.

Tie Condition

When all 3 layers are full and no player has won, the round ends in a tie.

Turn Rules

You can only do one action per turn:

- Draw and play a card
- OR call Win
- OR call Face-Off

You cannot mix these actions.

Example: After drawing, you cannot call win that turn.

Match Scoring

- Matching a Line: 1 point
- Successful Face-Off: 2 points
- Failed Face-Off: Opponent earns 1 point
- Tie: No points
- First player to reach 3 points wins the match.
